

JOLOFCOIN

(JOL)

 The Spiciest Meme Coin on the Blockchain 

Whitepaper V2
September 2025
Pape Mady Cisse

 **Reminder:** This token is *not* a payment method, not an investment, and not a promise of anything. It's digital hot sauce. 

Jolofcoin (JOL) White Paper V.2 – Meme Edition

Last updated: August 2025 • This document is for entertainment only.

 Jollof Vibes

ERC-20

1. Introduction

Jolofcoin (JOL) V.2 is an ERC-20 digital token created for **memes, culture, and fun**. It's a playful re-introduction of Jolofcoin for today's crypto culture, distinct from the original *Jolofcoin White Paper V.1 (2021)*, which presented a serious, proof-of-work currency concept for West Africa.

Important position: This Meme Edition is intentionally minimalist. **JOL has no intrinsic value, no guaranteed return, no financial rights, no governance, and no utility.** It exists solely for entertainment and community shenanigans.

2. Meme Tokenomics

Core Parameters

- **Blockchain:** Ethereum (ERC-20)
- **Ticker:** JOL
- **Decimals:** 18
- **Total Supply:** 14,800,000,000,000 JOL

Design Philosophy

- Transferable only — minimal features for maximum meme-ness.
- No minting after deployment; no promises to change supply.
- Ownership may be *renounced* post-deployment for trust vibes.

 **Reminder:** This token is *not* a payment method, not an investment, and not a promise of anything. It's digital hot sauce. 

3. What JOL Is *Not*

Borrowing the clarity of leading meme projects, for the avoidance of doubt, JOL is not, and is not intended to be:

- A medium of exchange accepted by the public for goods or services.
- Designed or intended to be used as payment for any goods or services.
- Redeemable for goods, services, cash, or other digital assets.
- A representation of money or e-money.
- A capital markets product, security, share, debenture, unit in a collective investment scheme, derivatives contract, commodity, or any other financial instrument or investment in any jurisdiction.
- Any shareholding, participation, right (including voting), title, stake or interest in, or right to participate in the business operations of any entity.
- An entitlement to dividends, revenue, profits, interest, or investment returns.
- Refundable or exchangeable for cash (or its equivalent in any digital asset).
- Evidence of indebtedness or a contract for differences.
- A guarantee to be listed on any exchange.

4. Community & Culture

Despite being functionless by design, JOL encourages community-led fun:

-  **Meme Battles:** weekly/monthly prompts; best spice takes win bragging rights.
-  **Jollof Showdowns:** friendly country-vs-country kitchen wars (with love).
-  **Short-form Chaos:** TikTok/IG reels featuring #JOL #SpiceUpTheChain.
-  **Airdrop Moments:** occasional surprises at the team's sole discretion.

These activities are optional, community-driven, and *not* a roadmap or a promise.

5. Launch Notes & Operations

5.1 Deployment

- Contract deployed on Ethereum; source code verified for transparency.
- Admin privileges (if any) exist solely for initial configuration and may be renounced.

5.2 Liquidity & Discoverability

- Initial liquidity may be provided on a DEX (e.g., Uniswap) at the team's discretion.
- LP tokens may be locked with a third-party locker to build confidence.
- Listing on price trackers (CoinGecko/CMC) is *not* guaranteed and may never occur.

5.3 Communications

- Primary comms via official social accounts; information may change without notice.
- No obligation to update this whitepaper; version at top is authoritative.

6. Risks & Real Talk

Volatility: Meme tokens are extremely volatile. Prices can swing wildly.

Liquidity Risk: Liquidity can be thin or removed. Never assume you can sell.

Smart-Contract Risk: Bugs may exist. Even verified code can have issues.

Regulatory Risk: Laws vary and may change; participation could be restricted.

Social Risk: Memes can age fast. Attention moves on. 

Do not buy JOL expecting profit. If you participate, do it for the memes.   

 **Reminder:** This token is *not* a payment method, not an investment, and not a promise of anything. It's digital hot sauce. 

7. Disclaimers & Notices

This whitepaper is intended for general informational and entertainment purposes only. It does **not** constitute a prospectus, offer document, offer of securities, capital markets products, digital payment tokens, or a solicitation for investment in any jurisdiction. No representation, warranty, or undertaking is made as to the accuracy or completeness of the information herein.

Nothing in this document constitutes an offer to sell JOL, nor shall it form the basis of, or be relied upon in connection with, any contract or investment decision. There are no promises or undertakings regarding future performance. The information here may be updated, removed, or become outdated without notice. **No regulatory authority** has examined or approved any information herein.

Continued holding or distribution of JOL (if any) will be governed by separate terms made available, at the team's sole discretion, which may be amended or withdrawn at any time.

8. Appendix: Relationship to White Paper V.1

V.1 (2021)

- Standalone PoW blockchain, script algorithm.
- West Africa single-currency thesis; wallets, miner framing.
- Serious positioning, economic context, utility focus.

V.2 (2025) – Meme Edition

- ERC-20 on Ethereum; minimal features.
- No utility, no roadmap guarantees, entertainment only.
- Community-led culture; clear legal-style disclaimers.

Do not buy JOL expecting profit. If you participate, do it for the memes.   

Reminder: This token is not a payment method, not an investment, and not a promise of anything. It's digital hot sauce.
